

## COVID-19 Prevention Program (CPP) for Northstar School

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

**Date:** 01/28/2021

### Authority and Responsibility

The governing board has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, the administrative team is responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

### Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections form** as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

### Employee participation

Employees are encouraged to participate in the identification and evaluation of COVID-19 hazards by reporting incidents to the administrative team.

### Employee screening

We screen our employees by self-screen according to CDPH guidelines. Face coverings, gloves, and touches thermometers are available and accessible.

### Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows:

The severity of the hazard will be assessed and corrected in a timely manner.

### Control of COVID-19 Hazards

## **Physical Distancing**

Where possible, we ensure at least six feet of physical distancing at all times in our workplace by:

- Reducing the number of persons in an area at one time, including visitors.
- Visual cues such as signs and floor markings to indicate where employees and others should be located or their direction and path of travel.
- Staggered arrival, departure, work, and break times.

Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved.

## **Face Coverings**

We provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department. A supply of clean, new face coverings will be kept on hand in both adult and child sizes.

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.

Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons unless the unmasked employee is tested at least twice weekly for COVID-19.

## **Engineering controls**

We implement the following measures for situations where we cannot maintain at least six feet between individuals:

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

- Keeping doors ajar and windows open during the instructional day to allow for natural air flow.
- HVAC filters will be updated and fans used if circumstances arise where the amount of outside air needs to be minimized due to other hazards, such as heat and wildfire smoke.
- The ventilation system will be properly maintained and adjusted on a regular basis.
- **Cleaning and disinfecting**

We implement the following cleaning and disinfection measures for frequently touched surfaces:

- Janitorial Services are provided for daily cleaning and disinfection of the school site.
- Adequate supplies of cleaning materials are on hand and replenished on a regular basis.

- Cleaning supplies are available in each classroom and common work spaces for disinfection throughout the day.
- Should we have a COVID-19 case in our workplace, we will implement the following procedures:

The facility will be deep cleaned and disinfected by janitorial services.

### **Shared tools, equipment and personal protective equipment (PPE)**

PPE must not be shared, e.g., gloves, goggles and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be disinfected between uses by cleaning with disinfecting wipes.

### **Hand sanitizing**

In order to implement effective hand sanitizing procedures, we:

- Provide ample access to hand washing stations and supply of hand sanitizer.
- Addition of new hand washing stations adjacent to Buildings B, D, and E.
- Time and reminders are posted to encourage employee hand washing.
- Employees are provided with an effective hand sanitizer, and we have prohibited hand sanitizers that contain methanol (i.e. methyl alcohol).
- Postings encourage employees to wash their hands for at least 20 seconds each time.

### **Personal protective equipment (PPE) used to control employees' exposure to COVID-19**

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained. We provide and ensure use of eye protection and respiratory protection in accordance with section 5144 when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids. [Delete if not applicable to your workplace.]

### **Investigating and Responding to COVID-19 Cases**

This will be accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

Employees who had potential COVID-19 exposure in our workplace will be:

- Offered COVID-19 testing at no cost during their working hours.
- The information on benefits described in Training and Instruction, and Exclusion of COVID-19 Cases, below, will be provided to them.

### **System for Communicating**

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Employees should report COVID-19 symptoms and possible hazards to the administrative team in person or via email.
- **That employees can report symptoms and hazards without fear of reprisal.**
- Our procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.
- Where testing is not required, how employees can access COVID-19 testing through the Avellino Labs testing site in Hayward or Kaiser Permanente under the school health care plan.
- In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test. Testing will be offered at no cost to employees.
- Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

### **Training and Instruction**

We will provide effective training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
- COVID-19 is an infectious disease that can be spread through the air.
- COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
- An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.

**Appendix D: COVID-19 Training Roster** will be used to document this training.

### **Exclusion of COVID-19 Cases**

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.

- Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings, seniority, and all other employee rights and benefits whenever we've demonstrated that the COVID-19 exposure is work related. This will be accomplished by employer-provided employee sick leave benefits, payments from public sources or other means of maintaining earnings, rights and benefits, where permitted by law and when not covered by workers' compensation.
- Providing employees at the time of exclusion with information on available benefits.

### **Reporting, Recordkeeping, and Access**

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

### **Return-to-Work Criteria**

- COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
- At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
- COVID-19 symptoms have improved.
- At least 10 days have passed since COVID-19 symptoms first appeared.
- COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work.
- If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.

**Approved by: Salwa Abed, Principal**
